About me

I am majoring in Computer Science at HCM University of Technology-HCMUT. I have a huge interest in designing and developing computer application. After a period of 3 years learning computer area and having been through quite a number of projects, I am eager to find a suitable place in your company. I am quite organized, energetic and also excellent in working with others to achieve a certain objective on time. I hope i will be a part of your community.

Projects

◆ NETFLIX CLONE

I built this app using React and Styled Components with Firebase (Firestore and Auth). Deploy on Firebase
Source: <https://github.com/quocthinh861/netflix-clone>
Demo: <https://netflix-clone-2d696.web.app>

◆ MOVIES APP

This App was built in React JS and Material UI with full responsive functionality. I use MovieDB API for backend.
Source: <https://github.com/quocthinh861/movies-react>
Demo: <https://quocthinh861.github.io/movies-react/>

◆ DISNEY+ CLONE

React using Firebase as database with Auth and Firestore
Source: <https://github.com/quocthinh861/disneyClone>
Demo: <https://disney-159b2.web.app>

◆ PORTFOLIO

Full responsive HTML and JS introduction website
Source: <https://github.com/quocthinh861/portfolio>
Demo: <https://quocthinh861.github.io/portfolio/>

◆ LINKEDIN CLONE

React using Firebase, Redux, Styled Components
Source: <https://github.com/quocthinh861/linkedinClone>
Demo: <https://linkedin-clone-363bb.web.app>

◆ FACEBOOK CLONE

React using Firebase, Redux
Source: <https://github.com/quocthinh861/facebookCLone>
Demo: <https://facebook-ae64d.web.app/>
